### ELEMENTS, ATTRIBUTES, AND USER EXPERIENCE

- A** This large-scale [Upfit](#) workshop is designed to promote collaboration and innovation with multiple spaces for spontaneous or planned, seated or standing, powered or unpowered, and short or long interactions.
- B** Adjacent to the building, [Upfit](#) units placed on a deck surface create a transition between indoor and outdoor work.
- C** A combination of [Upfit](#) louvered and open roofs, open and slatted interior walls, and glass markerboard panels and display monitors provide choices for the type of work and outdoor connection inhabitants desire.
- D** [Upfit](#) louvered roofs provide protection from wind and sun; weather management offers control of sun and shade levels and rain protection.
- E** Power for overhead lighting, monitors, and charging at work surface is delivered through [Upfit](#)'s posts and beams.
- F** [Go OutdoorTables](#) with power and USB charging along with [Chipman stools](#) support active postures and facilitate movement between the table and [Upfit](#) glass markerboard panels.

### ELEMENTS, ATTRIBUTES, AND USER EXPERIENCE

- G** Cochran lounge chairs and tables are grouped into a comfortable lounge configuration to encourage active discussion. Upfit glass markerboard panels support the sharing of ideas or an informal presentation.
- H** Socrates benches with the Universe system create an active drop-in zone for brief problem-solving or presentation activities.
- I** Tiered seating on the deck perimeter allows people to relax in unfiltered sunlight and supports larger group presentations.
- J** MultipliCITY path lighting defines the perimeter of the deck.
- K** Kornegay Square planters with grasses soften the hardscaping and introduce color and texture into the space.
