PLAY APPLICATION ROOFTOP DECK (RD)

PLAN

ELEVATION

ELEMENTS, ATTRIBUTES, AND USER EXPERIENCE

- A** A trio of [Upfit](#) structures become pergolas on the rooftop deck, providing shelter, amenities, and a sense of place in an outdoor setting.
- B** Upfit slatted panels offer visual privacy for occupants from inside the building and adjacent pergolas.
- C** The Upfit louvered roof provides protection from wind and sun; weather management offers control of sun and shade levels and rain protection.
- D** Power for overhead lighting is delivered through Upfit's posts and beams. Charging access points can also be located near tables and chairs.
- E** [Harvest standing-height tables](#) with [Chipman stools](#) offer generous surface for dining or working.
- F** [Cochran tables](#) and [lounging chairs](#) within the interior of Upfit create conversation groupings around the fireplace.
- G** [Cochran chaise lounges](#) offer places to relax and enjoy unobstructed views of the sky.
- H** Pairs of [Kornegay Mex Bold planters](#) dot the deck's outer boundary and introduce touches of color.
- I** Groupings of [Extasi benches](#) create informal perching zones at entrances to the building.
- J** [Charging stations](#) adjacent to Harvest tables provide power access for people working or browsing at the tables.
- K** [Torres path lights](#) define the edge of the deck steps.
