

TRANSIT APPLICATION

BIKE STATION 4 (B4)

VIEW #1

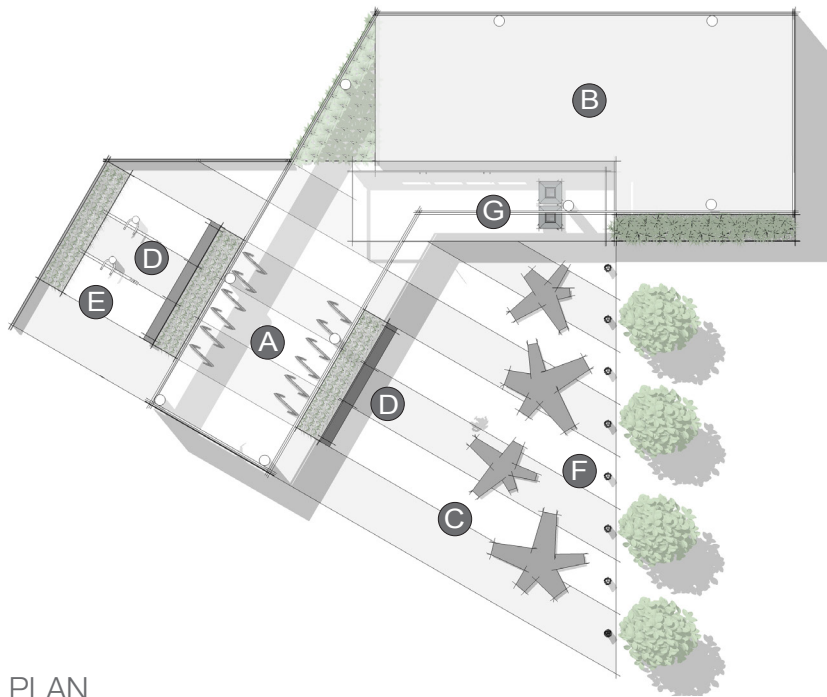

PLACE:
BICYCLE STATION

A bicycle station is a secure, sheltered facility that provides bike parking and other amenities such as changing areas, showers, equipment repair, and rental shops.

PRIMARY INSIGHT:
ESTABLISH A SENSE OF SECURITY

An enhanced travel experience can be created by establishing safe environments that reinforce basic personal safety for people and their belongings.

ELEMENTS, ATTRIBUTES, AND USER EXPERIENCE

- A** Rental bikes are visible and easily accessible, yet secured to **Loop bicycle racks** and placed within a sheltered area (custom element). Cyclists can also store their bikes outdoors while using facilities.
- B** Cyclists can safely store their bikes and belongings indoors while taking advantage of possible amenities such as showers and repair services.
- C** **Flor benches** support cyclists in informal social gatherings before or after cycling activities.
- D** **Jessie rails** provide a convenient place to lean and place personal items as cyclists congregate near the bike rental and self-serve maintenance areas.
- E** Cyclists can wash and repair bikes in the outdoor maintenance area (custom elements).
- F** **Guide bollards** define and illuminate the border of the entry and gathering areas, adding security and ambiance.
- G** **Pitch litters** provide attractive options to conceal and recycle waste.
