35COLLECTION

35COLLECTION

The 35 family is growing with a new generation of high performance products that ramp up the energy and edge. Design partner frog built on the 35 family lineage and brought it fast forward with an illuminated bollard and a lyrical bike rack that take this popular collection of integrated site elements to places it hasn't been before.

stay

This core member of the 35 family shares a strong work ethic and a gesture inspired by forms in nature. Stay is a cantilever bench with a graceful supporting arc. Benches are cast aluminum with perforated steel seats.

mingle & shade

Mingle is an open and inviting seating system that brings everybody to the table. Its distinctive asymmetric structure lends it an energetic air and makes access easy. The companion Shade umbrella has a graceful winged aluminum canopy that protects from the sun and imparts a sense of place. Positioned side-by-side, squared canopies create “waves.” Table mounted or stand alone.

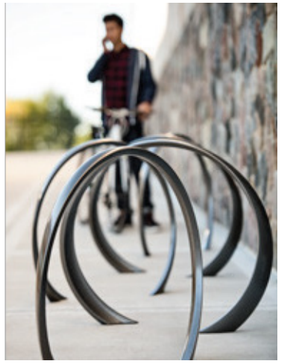

chill

This iconic chaise lounge epitomizes the easy disposition of the 35 family. Designed to bring a spirit of relaxation to outdoor public spaces, its sculptural form echoes the human body and supports the sitter in a posture that is reclined but not exposed. Made of rotational-molded polyethylene it is offered in a choice of colors.

loop

The Loop bike rack is a simple, sweeping circle with a twist. Cyclists can loop and lock one bike or two around its shape-shifting cast aluminum ribbon frame. Functional and sculptural, it meets a growing need for secure bicycle docking in recreational spaces and “complete streets,” carrying on the 35 Collection mission to support social activity in outdoor space.

guide

Guide is an illuminated bollard for pedestrian wayfinding that approaches light from a different point of view. Composed of three cast aluminum panels around an optical core of LED arrays, it emits light at 45° angles through the vertical slits between panels, illuminating the pathway in overlapping swathes of light. Full pathlight or dimmable light options are offered.
