

SHUFFLE is a connected, modular approach to city hardware - with its plug-and-play rotatable modules that contain pre-certified hardware, it can be configured to suit your specific needs.

KEY FEATURES

- > EN-40 certification
- > Galvanised steel
- > Multi-purpose door
- > Events door
- > PIR sensor integration

SHUFFLE POLE GEN2 is the latest generation of poles, purpose-built to support any SHUFFLE solution with strength, flexibility, and style.

Available in five configurations and various heights, it ranges from a streamlined one-door version to a full three-door model. Reinforced, generously sized access doors ensure easy integration and maintenance of electronic components.

Installation is versatile, with flange or recessed base options. Anchor bolt kits are also available.

Engineered in high-quality steel and hot-dip galvanised, SHUFFLE POLE GEN2 offers outstanding durability and corrosion resistance in all environments.

SHUFFLE POLE GEN2 is designed in accordance with EN 40-3-1, taking into account the characteristic loads, including the dead weight of installed equipment and wind loading on both the equipment and the pole itself. Its structural integrity has been verified by structural calculations in accordance with EN 40-3-3.

- Input for calculations for both flange plate and recessed mounting:
- Wind load: 36m/s
 - Terrain category: II
 - Partial load factor: Class B
 - Deflection: Class III
