Alcott

A refined interpretation of the classic lamppost, Alcott Area Light brings high-performance elegance to contemporary outdoor environments. With gently curved posts rising to heights of 12, 14, and 16 feet, and culminating in a domed LED luminaire, the fixture strikes a balance between the traditional and distinctly modern. The design approach offers visual continuity with traditional streetscapes while delivering the energy efficiency and longevity of today's lighting technologies. A thermoformed lens fully seals the luminaire, ensuring durability and performance in varied outdoor settings.

Part of the Concord collection, Alcott is designed in collaboration with Robert A. M. Stern Designs and reflects a “Modern Traditional” ethos—drawing from historic American influences while embracing current materials and manufacturing techniques. Concord’s five coordinated elements share a consistent design vocabulary that brings visual cohesion to public space. The collection’s emphasis on craft, proportion, and timeless detail positions it as a versatile solution for designers aiming to create welcoming environments rooted in a sense of place.

Buy America compliant and International Dark-Sky approved, Alcott Area Light also meets the practical and environmental needs of civic and institutional projects. Its sculptural form, contextual sensitivity, and responsible engineering make it an elegant and grounded choice for lighting pedestrian corridors, parks, campuses, and streetscapes.
