## A Human-Centered Luminaire for the Evolving Urban Landscape

There are some luminaire designs that meet the moment, and others that transcend them, embodying a deeper understanding of how people experience the urban landscape. Candela, designed by Spanish designer Gonzalo Milà for Urbidermis, represents this rare confluence of purpose and thoughtful ingenuity. It emerges as a luminaire that seamlessly merges classically modern design themes with performance, experience and enduring quality.

The slim silhouette of Candela is complemented by its elegant oval form that creates a defining presence in contemporary cityscapes. Its internal design integrates new light control options, and durable materials engineered and finished in highly durable powdercoat formulation provides long-term performance. With versatile configurations to suit a wide range of project needs and site placements, Candela has long exemplified a luminaire attuned to the demands of modern urban environments and a lasting commitment to sustainability.

## Legacy of Innovation

Gonzalo Milà approached the design of Candela from a profoundly human-centered perspective, incorporating ideas about how people gather, walk, and interact in the city after dark. This philosophy remains a foundational aspect of the Urbidermis approach to design.

## Purposeful Light for Every Urban Setting

Flexible optical systems support a wide range of applications, from intimate pedestrian zones to expansive urban avenues. With multiple light distributions, drive-current options, and color temperatures including PC Amber, 2200K, 2700K, 3000K, and 4000K, Candela can be precisely configured to meet each site's distinct requirements. An optional, internal shield refines control by limiting backlight and spill, protecting pedestrian areas and adjacent properties from unwanted illumination.

## A Shared Vision for Urban Spaces

Candela embodies an evolved understanding of how lighting shapes the experience of urban environments. The collaboration between Urbidermis and Landscape Forms unites two design leaders committed to creating enduring, sustainable solutions that enhance the character and livability of the public realm.

## Materials

### Powdercoated Metal

Light Grey  
RAL 9006 (ULG)

Medium Grey  
RAL 9007 (UMG)

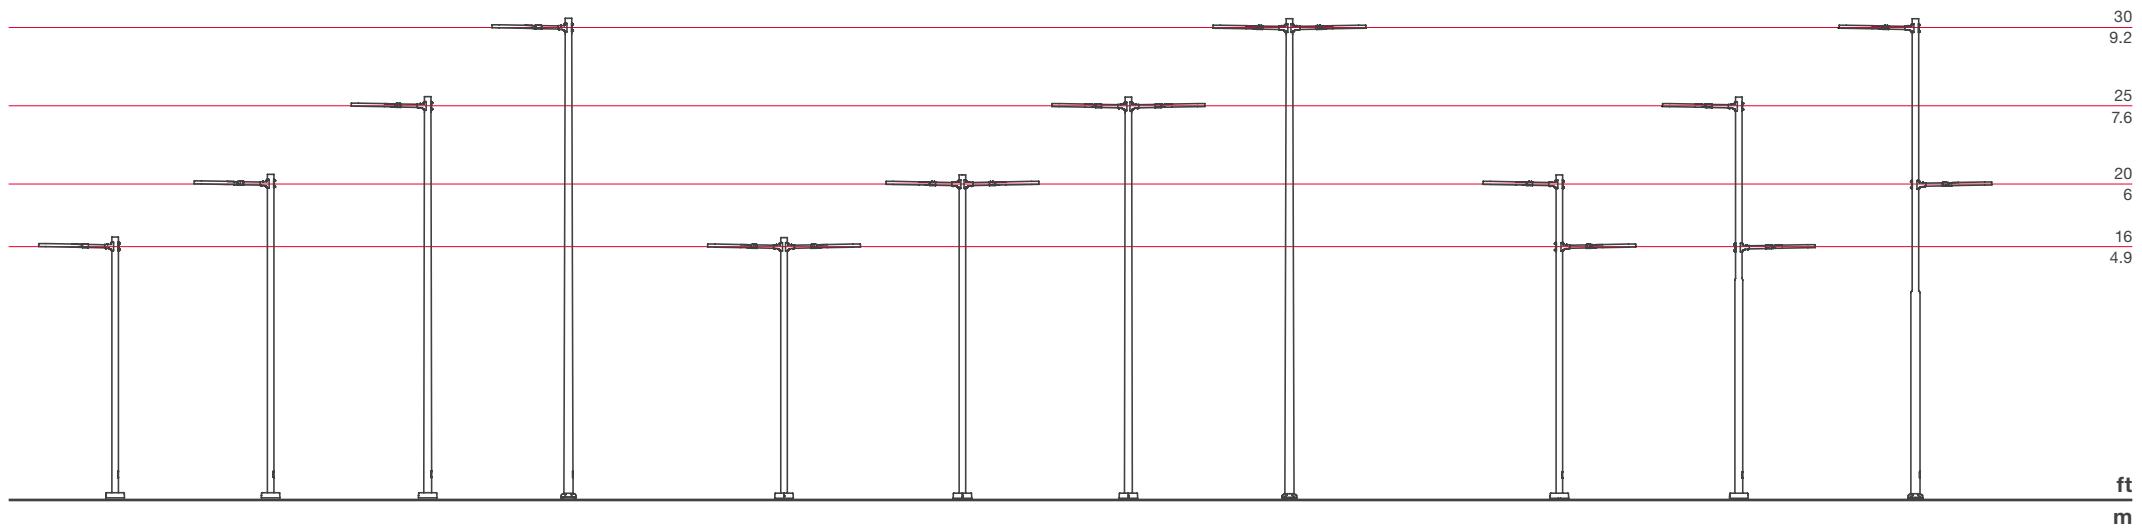

Dark Grey  
RAL 7024 (UDG)

Aluminum Silver  
(UAS)
