Powdercoated Metal

Powdercoated Metal Pangard II® Polyester Powdercoat is a hard, yet flexible, finish that resists rusting, chipping, peeling and fading. In addition to colors shown, a wide selection of optional and custom colors may be specified for an upcharge.

* All colors and patterns shown are approximate and may vary from sample and final.

Glass Fiber Reinforced Concrete (GFRC)

Glass Fiber Reinforced Concrete (GFRC) is an advanced composite material used in landscape elements, valued for its strength, durability and material efficiency. Its high strength-to-weight ratio enables thinner profiles and more expressive forms without sacrificing performance. Designed for long-term outdoor use, GFRC offers low water absorption to resist freeze-thaw conditions, moisture intrusion and surface efflorescence. The result is a durable, low-maintenance material that supports both elevated design and enduring quality.
