Material / Colors Sheet

Powdercoated Metal

Aluminum components are pre-treated with Seaside Quality A and finished with RAL powdercoat. Seaside Quality A pre-treatment protects aluminum profiles against the effects of aggressive environments, such as coastal or heavy industrial areas. Colors offered are exclusive to Scenic.

Woodgrain (Exterior, No Finish)

Exterior woods weather to a warm, pewter gray; no finish is applied so no maintenance is required. Available in Thermally Modified Ash (TMA).

Outdoor Curtains

Crafted from durable polyester, the outdoor curtains used on the Cove structure are designed to withstand various weather conditions while maintaining their aesthetic appeal. They feature a water-repellent, mold-resistant, dirt-resistant, and colorfast finish, ensuring long-lasting performance and vibrant appearance.

Canvas Ceiling Fabric

Made from woven fiberglass threads (36%) coated with PVC (64%), the canvas ceiling fabric offers a balance of durability and refined aesthetics. The tightly stretched canvas equipped with Fixscreen technology has a sealing profile to keep out dirt and insects.
