

Jules et Jim

landscapeforms

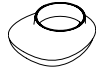

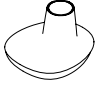

Product Data Sheet

Jules et Jim are versatile ultra-high-performance concrete planters with bases that form a bench. Jim and Jules can live as separate elements or in harmony as complementary forms. The planter-benches rest on paving with no need for anchors. Drainage in the planters is carried through an opening hidden in the base; no other drainage is needed. Both planters have a volume capacity of 2400 liters and are suitable for planting species of an average height.

Planter

- Jules et Jim are versatile planters, that share the same base.
- The planters have a seating element on the perimeter.
- Jules 80cm is a shorter and more open planter.
- Jim 140cm is a taller planter with a narrower opening.
- Capacity: Jules – 535 Gal. | Jim – 540 Gal.
- Planters are made of UHPC Slimconcrete® that is etched and waterproofed (see below for further details).
- Two superimposed pieces of UHPC concrete are inserted into each together.
- Drain hole is hidden in base, with a diameter of 36cm.
- Planters are freestanding.

	Style	Depth	Length	Height	Weight
	Jules 80cm	88"	81"	32"	2,476 lb
	Jim 140cm	88"	81"	55"	3,007 lb

Material

- Slimconcrete® is the trademarked name used by Escofet for its ultra-high performance cast stone, a recipe in which the aggregate contains reinforcing elements such as fiberglass, PVC (polyvinyl chloride), or PVA (polyvinyl alcohol).
- Slimconcrete® is a highly engineered material that enables casting of lighter weight, thin-profile forms with exceptional strength and high resistance to compression, bending, impact and wear.
- It has spurred experimentation with form and the creation of cast concrete products with novel structural and aesthetic qualities.
- The colors of Escofet cast stone products are neutral, muted and earth-toned and are derived from the aggregates used in casting.
- No color is added in manufacture and no color is applied to finished products.
- The color range of every Escofet cast stone product is pre-determined by the formulation used in its manufacture.
- Slimconcrete® products do not require any specific maintenance during their estimated lifespan of more than 30 years.
- Water absorption and freeze-thaw cycles can cause weathering, a reproduction of the process that takes place in natural rock.
- Escofet applies a waterproof finish to its products to protect against this process.
- Escofet cast stone products are large and heavy.
- Shipping, receiving, staging and installing these pieces is more akin to handling large statuary or pre-fabricated architectural elements.
- See installation guide for important information.

Jules et Jim

landscapeforms

Product Data Sheet

Product Warranty

- ESCOFET warrants the durability of its product to Landscape Forms for a period of five (5) years from the date of invoice.
- The warranty covers the repair or replacement of the product or components at no charge.
- Notwithstanding, this warranty does not cover damages to ESCOFET products resulting from unloading; handling; installation; abuse; exposure to paint, liquids or corrosives; or any other damage not attributable to ESCOFET.
- The warranty shall also be void if ESCOFET products are tampered with, handled, removed or modified by persons not authorized by ESCOFET; or if the product has not been properly maintained by the customer.

To Specify

- To order planter, select Jules or Jim and standard color.
- Planters are freestanding.
- See materials/color sheet for Escofet's standard color options.

Designed by Javier Mariscal for Escofet
