Escofet Cast Stone (with Polished Finish)

Socrates benches are manufactured from cast stone in the USA in partnership with Escofet. Cast stone is a refined and highly durable material intended to simulate natural-cut stone. Cast stone products feature high compressive strength, are resistant to weathering and absorption, and require little maintenance. Nonfading pigment options include Grey, Black, White and Beige.

Escofet USA Concrete (with Polished Finish)

Machine polished after a double grinding-polishing process, Escofet polished concrete features a smooth, durable, non-porous finish with vibrant color, accentuated aggregate, and a bright, lustrous texture that resembles granite or marble.

Escofet USA Concrete (with Acid-Etched Finish)

Escofet acid etching creates a subtle, lightly textured concrete surface finish that artfully marries the natural and built environments. Reminiscent of organic sandstone, this technique creates a “pre-weathered” finish that protects against additional weathering and whose surface color, texture and pattern remains consistent throughout long durations outside in the elements.
