FGP

FGP Area Light brings a sculptural, organic sensibility to pedestrian-scale lighting. Designed by Francisco Gomez Paz as part of the broader FGP collection, the area light features three subtly angled stems that branch outward from the pole to support a soft triangular head. This understated yet expressive form houses LED arrays that cast light cleanly and evenly between the stems, creating a focused, welcoming footprint. The result is lighting that not only enhances safety and usability but contributes to the visual rhythm and identity of a space.

Part of the Landscape Forms Global 45 initiative, FGP Area Light reflects a commitment to internationally relevant design paired with regionally sourced materials and sustainable manufacturing practices. Buy America compliant, its flat-pack shipping and local assembly options support lower carbon impact while maintaining high standards of design and performance. With its clean lines, elegant proportions, and confident simplicity, FGP Area Light is well suited for parks, plazas, streetscapes, and other environments where aesthetics, performance, and environmental responsibility align.

Part of the FGP family of furniture and lighting elements, FGP Area Light helps designers create cohesive public spaces that are beautiful, functional, and inviting at any hour. The collection's unified language of form and detail ensures consistency while allowing each element to stand on its own as an example of thoughtful design and lasting quality.

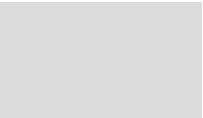

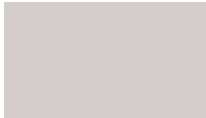

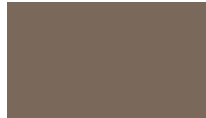

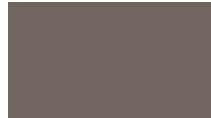

Materials

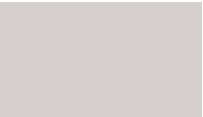

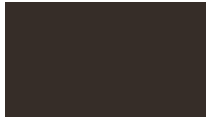

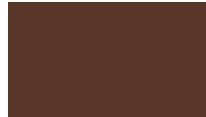

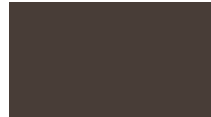

Vivid Series - Powdercoated Metal (Fine Texture)

					
Clay	Lemon	Mango	Chili	Loll Apple Red	Loll Leaf Green
					
Moss	Forest	Loll Navy Blue
