

# Lungo Mare

landscapeforms

## Product Data Sheet

An imposing organic landscape element, Lungo Mare creates a sense of harmony between the natural and built landscapes. Its undulating surface, suggesting rolling waves and sand dunes, welcomes several people to lounge in a variety of postures. Its stamped texture, resembling random deposits of sand, is comfortable against the skin.

### Lungo Mare

- Lungo Mare is a backless stone freestanding element, cast in three configurations.
- Its weight allows freestanding installation.
- Lungo Mare is made of Reinforced Cast Stone, and is offered in a soft-acid treated finish.
- Available in Grey, Black, White, and Beige.

### Material

- Reinforced Cast Stone is cast stone that is poured and cast over an iron re-bar cage built to fit within the walls of the mold.
- Reinforced Cast Stone makes it possible to cast thinner, irregularly shaped forms while retaining appropriate strength.
- The colors of Escofet cast stone products are neutral, muted and earth-toned and are derived from the aggregates used in casting.
- No color is added in manufacture and no color is applied to finished products.
- The color range of every Escofet cast stone product is pre-determined by the formulation used in its manufacture.
- Cast stone products do not require any specific maintenance during their estimated lifespan of more than 30 years.
- Water absorption and freeze-thaw cycles can cause weathering, a reproduction of the process that takes place in natural rock.
- Escofet applies a waterproof finish to its products to protect against this process.
- Escofet cast stone products are large and heavy.
- Shipping, receiving, staging and installing these pieces is more akin to handling large statuary or pre-fabricated architectural elements.
- See installation guide for important information.
