

MAYO

Product Data Sheet

The simple, robust form of this handsome backless bench projects a sense of rigor and strength without imposing on its environs. Generous square seat perforations create a pattern that casts shadows and provides an interesting contrast to natural and paved ground surfaces in the urban landscape.

Bench

- Mayo is a Reinforced Cast Stone backless bench with a perforated seat.
- The basic bench is offered in 87" and 117" lengths.
- Mayo has an acid-etched/waterproofed finish and is available in Grey, Black, White and Beige.
- Mayo is freestanding.

Material

- Reinforced Cast Stone is cast stone that is poured and cast over an iron re-bar cage built to fit within the walls of the mold.
- Reinforced Cast Stone makes it possible to cast thinner, irregularly shaped forms while retaining appropriate strength.
- The colors of Escofet cast stone products are neutral, muted and earth-toned and are derived from the aggregates used in casting.
- No color is added in manufacture and no color is applied to finished products.
- The color range of every Escofet cast stone product is pre-determined by the formulation used in its manufacture.
- Cast stone products do not require any specific maintenance during their estimated lifespan of more than 30 years.
- Water absorption and freeze-thaw cycles can cause weathering, a reproduction of the process that takes place in natural rock.
- Escofet applies a waterproof finish to its products to protect against this process.
- Escofet cast stone products are large and heavy.
- Shipping, receiving, staging and installing these pieces is more akin to handling large statuary or pre-fabricated architectural elements.
- See installation guide for important information.
