

# Rockford Litter + Recycling

landscapeforms

## Product Data Sheet

Rockford Litter + Recycling is a modern receptacle system created in collaboration with Grand Rapids-based industrial designer Michael Welsh. Available in side-opening and top-opening styles, the 45-gallon receptacles are designed to work both solo and in groupings for litter, recycling and compost. For both styles the lid can be color coded to clearly communicate its appropriate contents to users. A bag catch and locking front-access door ensure ease of servicing, allowing contents to be comfortably removed through the front of the receptacle.

### Litter + Recycling Receptacles

- Top and side opening receptacles are available with or without lock.
- 45-gallon capacity.
- Available freestanding or surface mount.
- The black polyethylene base is prefilled with sand and then plugged. This allows the unit to be freestanding. There are also slots in the base to allow for the unit to be surface mounted.
- Ships fully assembled.

### Finishes

- All metal is finished with Landscape Forms' proprietary Pangard II® polyester powdercoat, a hard yet flexible finish that resists rusting, chipping, peeling, and fading.
- Call for standard color chart.

### To Specify

- Select top or side-opening litter. Specify with or without lock.
- Select body powdercoat color.
- Select rim/lid powdercoat color and signage.
- Choose mounting style. Ships fully assembled.

- **Designed by Michael Welsh**
